Environmental Policy

It is the policy at J. Thomson Colour Printers to respect the environment, and to be committed to and responsible for the environmental performance of the company.

The company's Environmental Management System, which has been certified against the requirements of ISO 14001:2004, FSC and PEFC works on the basis of continual improvement and is regularly audited.

We ensure that all employees are trained and developed to understand, implement, maintain and improve the environmental objectives set at the company's Management Review Meeting. A series of environmental management programmes helps achieve these goals and objectives and are defined and reviewed annually at the company's Management Review Meeting.

Where possible the company reduce, re-use and recycle all materials to minimise waste and use environmentally responsible suppliers and sub-contractors in order to minimise the use of polluting releases and use energy as efficiently as possible.

The company strive to comply, at minimum, with all regulatory and legislative requirements, and to this end this policy is reviewed and updated, as required, at monthly management meetings.
